

Responsible Innovation

A journey to be better

filpucci®

Responsible innovation means creating a transparent, eco-centric strategy around all the aspects of corporate business, manufacture and final products. These values are strongly embedded in Filpucci DNA and they constitute the guide lines adopted by the company in her journey towards a more responsible approach to smart design and manufacture.

Filpucci has already taken many steps on this path, signing a 'Values Chart' in conjunction with "Consorzio Promozione Filati" to guarantee sustainable production chains that are fully traceable with certified materials and measured environmental performances, such as reducing CO₂, water use and power consumption. Its dyeing facilities are OCS accredited. In addition, Filpucci proudly is **Global Organic Textile Standard (GOTS)** certified; alongside it can boast recycling 70% of water used. The participation in the Detox Campaign over the past three years continues to move closer to its vision of being a responsible and transparent business. New in of this season: Filpucci increased its preciousness by incorporating an important social value as demonstrated by the certification **Sustainable Mohair South Africa**. The mohair industry is of paramount importance to the South African economy as it can provide many opportunities for employment and it is an important element for economic growth and social development of local communities. For these reasons the organization Mohair South Africa insists on the need to maintain the sustainability of the mohair sector in South Africa. Mohair farmers in South Africa are encouraged to register for a conformity assessment, which allows MSA sustainability managers access to farms where angora goats are reared for mohair production.

Moreover Filpucci has obtained since many years the Global Recycled Standard (GRS) certification, promoted by Textile Exchange, one of the most important no-profit organization that promotes international responsible and sustainable development in the textile industry.

GRS provides evidence for and criteria to cover the following areas:

- composition of the product and content of recycled materials;
- maintaining traceability throughout the entire production process;
- restrictions on the use of chemical;
- compliance with relevant environmental criteria as water supply and discharge as well as energy recovery; respect of social criteria relating to workers' rights.

An additional ingredient of value that is added to the FSC certified ENKA viscose and the RWS certified wool. **FSC (Forest Stewardship Council)** is an independent, non-governmental, not for profit organization established to promote the responsible management of the world's forests. The Responsible Wool Standard (RWS) by Textile Exchange is an independent and voluntary standard that ensures that sheep are treated with respect, it also guarantees the implementation of the best practices in terms of management and protection of the land.

Filpucci avails itself of 'Balance of Sustainability' a report that each year measures and accounts for issues relating to the business impact of such innovating strategy.

Filpucci, an innovation-driven company always in quest of revolutionary fibers, proposes in its sustainable selection of yarns TENCEL™ Luxe. **TENCEL™ Luxe** eco-botanic lyocell filaments are made from wood pulp, which is sourced from sustainable wood in line with Lenzing's strict Wood and Pulp Policy. They are produced using Lenzing's pioneering closed-loop lyocell production process, which has received the "European Award for the Environment" from the European Union. This process ensures minimal environmental impact due to low process water and energy use and raw materials consumption.

Last but not least, the **Higg Index** membership, developed by Sustainable Apparel Coalition, is a constantly evolving tool that enables brands, retailers, and facilities to accurately measure and score a company or product's sustainability performance. The Higg Index delivers a holistic overview that empowers businesses to make meaningful improvements that protect the well-being of factory workers, local communities, and the environment.

A successful example of Filpucci's commitment toward responsible innovation is **Re.VerSo™**, a new circular economy brand of manufacturing system for wool, cashmere and baby camel. It has been developed by qualified Italian partners and it represents a really advanced, integrated, fully transparent and traceable supply

chain. Re.VerSo™ gathers, selects and processes exclusive pre-consumer offcuts and trimmings recovered from already dyed wool, cashmere and baby camel materials.

Re.VerSo™ raw materials are **Global Recycled Standard (GRS)** certified, with a confirmed LCA (Life Cycle Assessment) study performed by Prima Q on Re.Verso wool and cashmere products. Compared with a similar but “conventional” product, the following savings have been confirmed:

Savings for 1.000 Kg of Re.Verso™ wool, compared to virgin wool *

Savings for 1.000 Kg of Re.Verso™, as compared to virgin cashmere *

In Filpucci **SS21 Collection** there are 38 sustainable and certified yarns, a various assortment with a well balanced selection of new seasonal developments and carry-overs:

ARABIS

Nm 4200
100% GOTS Certified Organic Cotton
Gauge: 5

The look: historical flat ribbon in mercerised cotton for a fresh and natural-chic look.

The Story behind the fibre:

GOTS Cotton - The Global Organic Textile Standard GOTS is the most important standard for sustainable production of garments and natural fibre textile products from organic farming such as organic cotton or organic wool. GOTS certification applies to textile products, the textile chemicals used, and all manufacturing activities. GOTS criteria measures environmental, technical quality, toxicity and social impacts. GOTS is backed by independent certification for the entire supply chain.

Certifications:

Cotton: GOTS Global Organic Textile Standard

(TC): Transaction Certificate (TC) is available upon request before placing the order.

BABOL

Nm 28000
86% FSC certified Enka Viscose, 14% Polyamide fibre **STRETCH**
Gauge: 14

The look: basic and versatile stretch viscose available in shiny and mat version, fluid and flexible.

The Story behind the fibre:

Enka Viscose - ENKA manufactures viscose filament yarns under its own proprietary technology in a complex manufacturing process. Such yarns consist of multiples of endless single filaments, which are wound on bobbins or beams at the end of the manufacturing process.

Certifications:

FSC Viscose - Forest Stewardship Council (FSC) is an independent, non-governmental, not for profit organization established to set standards for responsible global forest management. FSC Certification confirms that the forest is being managed in a way that supports a responsible viable economy, preserves stem and benefits the lives of local people and workers, all while ensuring it sustains economically viability.

 **FAST SERVICE** Shipment ex-mill in two weeks of order placed with surcharge of 30% on base price list. This is offered being dependant on the availability of Raw White material. For full details please contact our Export Department.

BACO

Nm 1800

100% GOTS Certified Organic Cotton

Gauge: 3

The look: Fancy yarn with an irregular surface inspired by the tangled patterns of plant life and by the silhouettes of lepidoptera. In pure organic cotton, natural, fresh and sustainable.

The Story behind the fibre:

GOTS Cotton - The Global Organic Textile Standard GOTS is the most important standard for sustainable production of garments and natural fibre textile products from organic farming such as organic cotton or organic wool. GOTS certification applies to textile products, the textile chemicals used, and all manufacturing activities. GOTS criteria measures environmental, technical quality, toxicity and social impacts. GOTS is backed by independent certification for the entire supply chain.

Certifications:

Cotton: GOTS Global Organic Textile Standard

(TC): Transaction Certificate (TC) is available upon request before placing the order.

BIONYCO -BIONYCO XL

Nm 5000 -2500

70% GOTS Certified Organic Makò Cotton, 30% Recycled Polyamide fibre

Gauge: 5, 3

The look: a voluminous, delicate, rounded and soft sculptural combination of cotton and smooth high-tech polyamide. This soft to the feel fibre creates a swollen effect by enveloping the stretch material. The result is a high-tech, fluffy and smooth yarn that is super light and extremely modern, ideal for plains and patterned effect knits.

The Story behind the fibre:

GOTS Cotton - The Global Organic Textile Standard GOTS is the most important standard for sustainable production of garments and natural fibre textile products from organic farming such as organic cotton or organic wool. GOTS certification applies to textile products, the textile chemicals used, and all manufacturing activities. GOTS criteria measures environmental, technical quality, toxicity and social impacts. GOTS is backed by independent certification for the entire supply chain.

Q-NOVA®by Fulgar is an environmentally sustainable nylon 6.6 fibre obtained exclusively from regenerated raw materials coming from Fulgar facilities scraps that meet traceability requirements. The discarded materials are recast using a mechanical regeneration process, they are afterwards transformed and combined into new yarn qualities.

Certifications:

Cotton: GOTS Global Organic Textile Standard

(TC): Transaction Certificate (TC) is available upon request before placing the order.

BONTON

Nm 22000

87% GOTS Certified Organic Linen, 10% Polyamide fibre, 3% Elastan

Gauge: 14

Made with 87% Organic Linen
(GOTS 2017-069)

The look: a new stretch linen that confers softness to the resistant linen feel, combining a modern functionality and a dynamic performance. It achieves a new and valuable result in terms of ductility and smoothness.

The Story behind the fibre:

GOTS Linen - The Global Organic Textile Standard GOTS is the most important standard for sustainable production of garments and natural fibre textile products from organic farming such as organic cotton or organic wool. GOTS certification applies to textile products, the textile chemicals used, and all manufacturing activities. GOTS criteria measures environmental, technical quality, toxicity and social impacts. GOTS is backed by independent certification for the entire supply chain.

Certifications:

Linen: GOTS (Global Organic Textile Standard)

(TC): Transaction Certificate (TC) is available upon request before placing the order.

ECO-TECH

Nm 28000

100% Recycled Polyamide fibre

Gauge: 14/18

Made with 60% Recycled Polyamide
(GRS 2017-031)

The look: Technical and smooth yarn, in 100% Q-NOVA by Fulgar, comfortable, flexible, contains 60% of recycled nylon for a technical and sustainable look.

The Story behind the fibre:

GRS Polyamide fibre Q-NOVA® - Q-NOVA® is an environmentally sustainable nylon 6.6 fibre obtained exclusively from regenerated raw materials coming from Fulgar facilities scraps that meet traceability requirements. The discarded materials are recast using a mechanical regeneration process, they are afterwards transformed and combined into new yarn qualities.

Certifications:

Global Recycled Standard (GRS) is promoted by Textile Exchange, one of the most important no-profit organization that promotes international responsible and sustainable development in the textile industry. GRS provides evidence for and criteria to cover the following areas:

- composition of the product and content of recycled materials;
- maintaining traceability throughout the entire production process;
- restrictions on the use of chemical;
- compliance with relevant environmental criteria as water supply and discharge as well as energy recovery; respect of social criteria relating to workers' rights.

(TC): Transaction Certificate (TC) is available upon request before placing the order.

ESSENZA

Nm 44000

76% FSC Certified Enka Viscose, 24% Polyamide fibre

Gauge: 16/18

The look: extra-thin viscose characterised by a delicate and precious shining effect.

The Story behind the fibre:

Enka Viscose - ENKA manufactures viscose filament yarns under its own proprietary technology in a complex manufacturing process. Such yarns consist of multiples of endless single filaments, which are wound on bobbins or beams at the end of the manufacturing process.

Certifications:

FSC Viscose - Forest Stewardship Council (FSC) is an independent, non-governmental, not for profit organization established to set standards for responsible global forest management. FSC Certification confirms that the forest is being managed in a way that supports a responsible viable economy, preserves stem and benefits the lives of local people and workers, all while ensuring it sustains economically viability.

FAST SERVICE Shipment ex-mill in two weeks of order placed with surcharge of 30% on base price list. This is offered being dependant on the availability of Raw White material. For full details please contact our Export Department.

GOMMA

Nm 8000

83% FSC Certified Enka Viscose, 17% Polyamide fibre **STRETCH**

Gauge: 7

The look: Compact, materic and comfortable viscose with water resistant effect.

The Story behind the fibre:

Enka Viscose - ENKA manufactures viscose filament yarns under its own proprietary technology in a complex manufacturing process. Such yarns consist of multiples of endless single filaments, which are wound on bobbins or beams at the end of the manufacturing process.

Certifications:

FSC Viscose - Forest Stewardship Council (FSC) is an independent, non-governmental, not for profit organization established to set standards for responsible global forest management. FSC Certification confirms that the forest is being managed in a way that supports a responsible viable economy, preserves stem and benefits the lives of local people and workers, all while ensuring it sustains economically viability.

HAIKU

Nm 4800

100% GOTS Certified Organic Cotton

Gauge: 7

Organic
(GOTS 2017-069)

The look: spiralled pure organic semi-mat cotton with a natural and fresh touch.

The Story behind the fibre:

GOTS Cotton - il Global Organic Textile Standard (GOTS) è globalmente riconosciuto come lo standard più importante per la produzione sostenibile di indumenti e prodotti tessili realizzati con fibre naturali provenienti da coltivazione biologica, come il cotone biologico o la lana biologica. Con GOTS è possibile certificare: prodotti tessili, prodotti chimici comunemente impiegati nell'industria tessile e attività manifatturiere. I parametri GOTS includono la qualità tecnica ed ambientale, così come la tossicità e la tutela sociale, le quali sono garantite per tutta la filiera dalla certificazione stessa.

Certifications:

Cotton: GOTS Global Organic Textile Standard

(TC): Transaction Certificate (TC) is available upon request before placing the order.

HYPER

Nm 24000

67% FSC Certified Enka Viscose, 33% Polyester fibre

Gauge: 14

The look: Innovative viscose stretch yarn with high resilience and elasticity. Sorona® polyester fibre, with 37% of bio-based material, gives the garment a matic texture, a delicately irregular and slightly grainy surface.

The Story behind the fibre:

Polyester fibre Sorona® - Sorona® is an innovative polyester fiber composed by bio-polytrimethylenterephthalate (PPT), derived from glucose fermentation and corn seeds processing.37% of the polymer is made using annually renewable plant-based ingredients. The revolutionary Bio-PDO compound turns a formerly chemical process into an eco-efficient biological one.

Enka Viscose - ENKA manufactures viscose filament yarns under its own proprietary technology in a complex manufacturing process. Such yarns consist of multiples of endless single filaments, which are wound on bobbins or beams at the end of the manufacturing process.

Certifications:

FSC Viscose - Forest Stewardship Council (FSC) is an independent, non-governmental, not for profit organization established to set standards for responsible global forest management. FSC Certification confirms that the forest is being managed in a way that supports a responsible viable economy, preserves stem and benefits the lives of local people and workers, all while ensuring it sustains economically viability.

INDACO

Nm 1700

60% GOTS Certified Organic Cotton, 25% GOTS Certified Organic Linen,

15% Polyamide fibre

Gauge: 3

Made with 60% Organic Cotton;
Made with 25% Organic Linen
(GOTS 2017-069)

The look: a blend of organic cotton and linen, a voluminous and light fantasy yarn with hand-crafted look inspired by raw and folk suggestions, for chunky and irregular knit-wear.

The Story behind the fibre:

GOTS Cotton and Linen - The Global Organic Textile Standard GOTS is the most important standard for sustainable production of garments and natural fibre textile products from organic farming such as organic cotton or organic wool. GOTS certification applies to textile products, the textile chemicals used, and all manufacturing activities. GOTS criteria measures environmental, technical quality, toxicity and social impacts. GOTS is backed by independent certification for the entire supply chain.

Certifications:

Cotton: (Global Organic Textile Standard)

Linen: (Global Organic Textile Standard)

(TC): Transaction Certificate (TC) is available upon request before placing the order.

LINUM

Nm 1300
63% GRS Certified Recycled Linen, 37% Organic Cotton
Gauge: 3

Made with 63% Recycled Linen
(GRS 2017-031)

The look: a very original linen yarn, inspired by the craftsmanship world, a fancy structure designed to enhance the natural features of the raw linen fiber. A 100% sustainable quality, a hand-made, raw and natural look.

The Story behind the fibre:

GRS Linen - Global Recycled Standard (GRS) is promoted by Textile Exchange, one of the most important no-profit organization that promotes international responsible and sustainable development in the textile industry. GRS provides evidence for and criteria to cover the following areas:

- composition of the product and content of recycled materials;
- maintaining traceability throughout the entire production process;
- restrictions on the use of chemical;

Certifications:

Linen: GRS (Global Recycled Standard)

(TC): Transaction Certificate (TC) is available upon request before placing the order.

LUMEN

Nm 40000
100% Tencel™ Luxe
Gauge: 18

The look: elegant and innovative yarn with a precious and delicately silky shining, inspired by the biology of wild plant and animal life. The smooth surface gives the garment a beautifully pleasant silk effect, for hyper sensual, liquid and wet-look silhouettes.

The Story behind the fibre:

Tencel™ Luxe by Lenzing: TENCEL™ Luxe eco-botanic lyocell filaments are made from wood pulp, which is sourced from sustainable wood in line with Lenzing's strict Wood and Pulp Policy. They are produced using Lenzing's pioneering closed-loop lyocell production process, which has received the "European Award for the Environment" from the European Union. This process ensures minimal environmental impact due to low process water and energy use and raw materials consumption.

METEORA

Nm 34000
63% FSC Certified Enka Viscose, 20% Polyamide fibre, 17% Polyester fibre
Gauge: 16/18

The look: fancy yarn inspired by traditional dyeing techniques and by delavé fabrics. The lurex fibre gives a glam touch to a casual and sporty look.

The Story behind the fibre:

Enka Viscose - ENKA manufactures viscose filament yarns under its own proprietary technology in a complex manufacturing process. Such yarns consist of multiples of endless single filaments, which are wound on bobbins or beams at the end of the manufacturing process.

Certifications:

FSC Viscose - Forest Stewardship Council (FSC) is an independent, non-governmental, not for profit organization established to set standards for responsible global forest management. FSC Certification confirms that the forest is being managed in a way that supports a responsible viable economy, preserves stem and benefits the lives of local people and workers, all while ensuring it sustains economically viability.

NUBE

Nm 42000
76% FSC Certified Enka Viscose, 24% Polyester fibre
Gauge: 16/18

The look: modern and versatile FSC certified viscose, it is presented with a shimmering palette inspired by the hypnotic shades of wild flora and fauna.

The Story behind the fibre:

Enka Viscose - ENKA manufactures viscose filament yarns under its own proprietary technology in a complex manufacturing process. Such yarns consist of multiples of endless single filaments, which are wound on bobbins or beams at the end of the manufacturing process.

Certifications:

FSC Viscose - Forest Stewardship Council (FSC) is an independent, non-governmental, not for profit organization established to set standards for responsible global forest management. FSC Certification confirms that the forest is being managed in a way that supports a responsible viable economy, preserves stem and benefits the lives of local people and workers, all while ensuring it sustains economically viability.

PACIFIC

Nm 2/68000
86% GOTS Certified Organic Cotton, 14% Polyamide fibre **STRETCH**
Gauge: 14/16

Made with 86% Organic Cotton
(GOTS 2017-069)

The look: basic stretch cotton, flexible and ultra-thin, spun with Core-Spun technology, which ensures reactivity and comfort, suitable for comfortable and second-skin silhouettes.

The Story behind the fibre:

GOTS Cotton - il Global Organic Textile Standard (GOTS) è globalmente riconosciuto come lo standard più importante per la produzione sostenibile di indumenti e prodotti tessili realizzati con fibre naturali provenienti da coltivazione biologica, come il cotone biologico o la lana biologica. Con GOTS è possibile certificare: prodotti tessili, prodotti chimici comunemente impiegati nell'industria tessile e attività manifatturiere. SUB

Nm 46000

67% FSC Certified Enka Viscose, 33% stretch polyester **STRETCH**

Gauge: 16/18

The look: ultra-modern viscose with a second skin effect for high flexibility and smooth garments with second-skin effect silhouettes.

The Story behind the fibre:

Enka Viscose - ENKA manufactures viscose filament yarns under its own proprietary technology in a complex manufacturing process. Such yarns consist of multiples of endless single filaments, which are wound on bobbins or beams at the end of the manufacturing process.

Certifications:

FSC Viscose - Forest Stewardship Council (FSC) is an independent, non-governmental, not for profit organization established to set standards for responsible global forest management. FSC Certification confirms that the forest is being managed in a way that supports a responsible viable economy, preserves stem and benefits the lives of local people and workers, all while ensuring it sustains economically viability.

SUGHERO

Nm 3000

78% GOTS Certified Organic Cotton, 22% Polyamide fibre

Gauge: 3

Made with 78% Organic Cotton
(GOTS 2017-069)

The look: a yarn that recreates the effect of a tree bark, like a creative and elegant ribbon that is light and luminous and characterized by a unique cotton embroidery effect.

The Story behind the fibre:

GOTS Cotton - The Global Organic Textile Standard GOTS is the most important standard for sustainable production of garments and natural fibre textile products from organic farming such as organic cotton or organic wool. GOTS certification applies to textile products, the textile chemicals used, and all manufacturing activities. GOTS criteria measures environmental, technical quality, toxicity and social impacts. GOTS is backed by independent certification for the entire supply chain.

Certifications:

Cotton: GOTS Global Organic Textile Standard

(TC): Transaction Certificate (TC) is available upon request before placing the order.

TALCO

Nm 34000

83% FSC Certified Enka Viscose, 17%

The look: stretch viscose blended with Elité, light, thin and compact for responsive garments characterised by flexibility and comfort.

The Story behind the fibre:

Enka Viscose - ENKA manufactures viscose filament yarns under its own proprietary technology in a complex manufacturing process. Such yarns consist of multiples of endless single filaments, which are wound on bobbins or beams at the end of the manufacturing process.

Certifications:

FSC Viscose - Forest Stewardship Council (FSC) is an independent, non-governmental, not for profit organization established to set standards for responsible global forest management. FSC Certification confirms that the forest is being managed in a way that supports a responsible viable economy, preserves stem and benefits the lives of local people and workers, all while ensuring it sustains economically viability.

Shipment ex-mill in two weeks of order placed with surcharge of 30% on base price list. This is offered being dependant on the availability of Raw White material. For full details please contact our Export Department.

TELA

Nm 2500

70% GOTS Certified Organic Cotton, 30% Lyocell

Gauge: 3

Made with 70% Organic Cotton
(GOTS 2017-069)

The look: rustic cotton ribbon blended with TENCEL™ Lyocell which lends freshness, pliability and sustainability for chunky, natural and green knitwear.

The Story behind the fibre:

GOTS Cotton - The Global Organic Textile Standard GOTS is the most important standard for sustainable production of garments and natural fibre textile products from organic farming such as organic cotton or organic wool. GOTS certification applies to textile products, the textile chemicals used, and all manufacturing activities. GOTS criteria measures environmental, technical quality, toxicity and social impacts. GOTS is backed by independent certification for the entire supply chain.

Certifications:

Cotton: GOTS Global Organic Textile Standard

(TC): Transaction Certificate (TC) is available upon request before placing the order.

TENAX

Nm 29000

72% FSC Certified Enka Viscose, 28% Polyamide fibre

Gauge: 14/16

The look: a new interpretation of a classic stretch yarn by Filpucci, Cipria, revamped in a sustainable way with FSC certified viscose.

The Story behind the fibre:

Enka Viscose - ENKA manufactures viscose filament yarns under its own proprietary technology in a complex manufacturing process. Such yarns consist of multiples of endless single filaments, which are wound on bobbins or beams at the end of the manufacturing process.

Certifications:

FSC Viscose - Forest Stewardship Council (FSC) is an independent, non-governmental, not for profit organization established to set standards for responsible global forest management. FSC Certification confirms that the forest is being managed in a way that supports a responsible viable economy, preserves stem and benefits the lives of local people and workers, all while ensuring it sustains economically viability.

THUYA-THUYA WASHABLE

Nm 15000-20000

100% FSC Certified Enka Viscose

Gauge: 12

The look: mat, light and fluid viscose, also available in a machine washable version.

The Story behind the fibre:

Enka Viscose - ENKA manufactures viscose filament yarns under its own proprietary technology in a complex manufacturing process. Such yarns consist of multiples of endless single filaments, which are wound on bobbins or beams at the end of the manufacturing process.

Certifications:

FSC Viscose - Forest Stewardship Council (FSC) is an independent, non-governmental, not for profit organization established to set standards for responsible global forest management. FSC Certification confirms that the forest is being managed in a way that supports a responsible viable economy, preserves stem and benefits the lives of local people and workers, all while ensuring it sustains economically viability.

 **FAST SERVICE** Shipment ex-mill in two weeks of order placed with surcharge of 30% on base price list. This is offered being dependant on the availability of Raw White material. For full details please contact our Export Department.

VISCOX

Nm 34000

75% FSC Certified Enka Viscose, 25% Steel

Gauge: 14

The look: shiny fantasy viscose which characterises the garment with a peculiar crumpled effect.

The Story behind the fibre:

Enka Viscose - ENKA manufactures viscose filament yarns under its own proprietary technology in a complex manufacturing process. Such yarns consist of multiples of endless single filaments, which are wound on bobbins or beams at the end of the manufacturing process.
